## Railroad Unions May Furnish Aid To Mine Strikers

President of Railroad  
Telegraphers Says Meet-  
ing Will Be Held. "If  
Miners Ask Our Aid."

### BACKING WOULD TAKE FINANCIAL FORM ONLY

But Possibility of More  
Material Co-operation Is  
Dimly Seen in Coming  
Months.

BY ALEXANDER F. JONES,  
United News Staff Correspondent.  
Chicago, April 2.—Leaders of the  
powerful railroad unions are expect-  
ed to call a meeting to discuss aid  
to the 500,000 coal miners now on  
strike.

The call for this meeting probably  
will be issued by E. J. Manion, pres-  
ident of the Order of Railroad Tele-  
graphers, it was stated here Sunday  
at a big meeting of rail union heads. The  
suggestion for the conference  
came originally from Warren S. Stone,  
grand chief of the Brotherhood of  
Locomotive Engineers, and he, with  
Manion, is said to be back of the  
movement. All of the railroad union  
leaders have not been sound on  
the proposal yet, it was stated, but a decision is expected to be reached  
within a few days.

"If the miners ask for our aid the  
meeting will be held," Manion told  
the United News.

### Financial Aid First.

While Manion declined to be quoted  
further, it was stated by another au-  
thoritative source, that the first ob-  
ject of the proposed meeting would  
be to get together on ways and means  
to give the miners financial aid.

The proposition was reported to  
have been discussed at the confer-  
ence here Sunday attended by leaders  
of group 3 of the railroad unions,  
composed of the telegraphers, sta-  
tionary firemen, clerks, maintenance  
of way men and signalmen. One of  
the strongest advocates of giving aid  
to the miners was said to be E. H.  
Fagerberg, president of the Brother-  
hood of Railway and Steamship  
Clerks, Freight Handlers, Station and  
Express Employees. They also dis-  
cussed nominations for a new labor  
member of the railroad labor board  
to succeed Albert Phillips, resigned.

The rail unions are already commit-  
ted by a pact signed by leaders of  
both of these big industrial forces to  
aid the miners. This pact was ar-  
rived at in a joint conference here  
last month. But it must be ratified  
by all the railroad unions before it  
becomes effective.

### Troubles of Own.

Back of the interest of the rail  
unions in the miners' fight is a strug-  
gle they have on their hands on the  
wage and working rule question,  
which is expected to come to a head  
in midsummer.

It is expected that the railroad la-  
bor board will hand down a decision,  
perhaps by July 1, setting new wage  
schedules for 2,000,000 railroad em-  
ployees, and, in addition, new work-  
ing rules for the powerful "big four"  
brotherhoods.

These questions are before the la-  
bor board now and while it is point-  
ed out that anything outside of financial  
support for the miners at this time  
would be highly improbable, it is said  
that even more material co-operation  
might be forthcoming after the coming  
wage decision, if, as expected, it trimms  
\$200,000,000 from the annual wages  
of the railroads, and provides that the  
coal strike is still on.

### Looking Far Afield.

One rail union chief said this pos-  
sibility was "looking pretty far  
afield," but he added that "they have  
done worse guesses as to what we are  
looking forward to."

The "big four" threatened to strike  
last October when the railroads first  
suggested going to the labor board for  
another wage cut. The railroad ex-  
ecutives declared they were "crying  
before they were hurt." But the pres-

## Sheldon Gives Impromptu Organ Recital by WGM

Thousands of people tuned in to  
WGM Sunday afternoon heard the  
concert broadcasted by The Atlanta  
Constitution from the Auditorium,  
where Charles A. Sheldon Jr., city  
organist, gave an impromptu organ  
program on the city organ. He picked  
his selections from scores of requests  
which he received during last week.

While Mr. Sheldon was able to sat-  
isfy the requests made by a number  
of people, for there were many dupli-  
cations of requests, his time of thirty  
minutes did not permit him to get to  
all of the selections asked by enthu-  
siasts. It is his intention to work  
some of these other selections into future  
programs, but in the meantime  
asked that more requests be sent to  
him.

Special programs are being arran-  
ged by Mr. Sheldon for the next few  
weeks.

## IT MAY REQUIRE \$75,000,000 FUND TO JUNK WARSHIPS

U. S. Battleships, Doomed  
by Disarmament  
Treaty, Present Puzzling  
Disposal Problem.

### VARIOUS METHODS ARE SUGGESTED

Some Experts Say \$75,-  
000,000 Appropriation for  
"Junking Costs" Will  
Prove Cheapest.

### HOW WOULD YOU SCRAP A WARSHIP?

Washington, April 2.—Follow-  
ing are suggested plans for scrap-  
ping warships doomed by the na-  
val treaty:

1. Sell them to the highest bid-  
ers and let purchasers cut them  
up and salvage the scrap metal.

2. Let the government finance  
the whole deal, navy yards do the  
work and store the scrap metal  
until the present depression is over  
and the price of scrap steel is  
back to normal.

3. Take all of the ships afloat  
out to sea after stripping all sal-  
vageable material off and send them  
to the bottom.

4. Let private firms take the  
ships and scrap them "on the  
shares."

5. Utilize them to make break-  
water at Los Angeles harbor or  
elsewhere, by stripping them of all  
material, filling them with sand  
and mud and sinking them in po-  
sition end to end.

### BY ROBERT J. BENDER. United News Staff Correspondent.

Washington, April 2.—Congress will  
is turning its attention to the accumu-  
lated work before it in an effort to con-  
clude its labor so adjournment can be  
taken before the hot weather.

June 1 has been tentatively set as  
the date for the session's end, but  
leaders realize it may be impossible to  
dispose of pending matters by that  
time. A number of problems are cer-  
tain to involve long debate.

Chief among these is the permanent  
tariff, which the Senate finance com-  
mittee expects to report out this week.

The bill has been radically altered  
from the form in which it passed the  
house, because the American valuation  
plan as adopted by the lower chamber  
was considered impracticable.

### "Tariff Bloc."

Consideration of the tariff will mark  
the appearance of the "tariff bloc" in  
the Senate, an organization of twenty-  
five senators from western and mid-  
western states interested in obtaining  
of way men and signalmen. One of  
the strongest advocates of giving aid  
to the miners was said to be E. H.  
Fagerberg, president of the Brother-  
hood of Railway and Steamship  
Clerks, Freight Handlers, Station and  
Express Employees. They also dis-  
cussed nominations for a new labor  
member of the railroad labor board  
to succeed Albert Phillips, resigned.

The rail unions are already commit-  
ted by a pact signed by leaders of  
both of these big industrial forces to  
aid the miners. This pact was ar-  
rived at in a joint conference here  
last month. But it must be ratified  
by all the railroad unions before it  
becomes effective.

## ALDERMAN DENIES SELFISH MOTIVES

Chosewood Says That He  
Does Not Own Property  
Near Stockade Site, As  
Charged at Meeting.

Replying to charges made at a  
third ward mass meeting Saturday  
night that selfish pecuniary motives  
are back of his support of the city  
stockade property as the site for  
the so-to-side high school, Alderman  
Charles L. Chosewood issued a state-  
ment Sunday night denying them as  
"false and malicious."

The charges against Mr. Chosewood  
were made in a speech delivered by  
W. B. Hartfield, president of the  
Third Ward Improvement club, and  
also assailed the alderman as "using  
his position to get public improve-  
ments around his own property, while  
the rest of the ward suffered."

The alderman declared Sunday that  
any statements by Mr. Hartfield that  
"I own or have purchased property  
adjacent to the stockade property are  
false and malicious. In fact, all the  
property I own is nearer the building  
site on Atlanta avenue than the

## Ridley Will Aid In Fight for Life Of Frank DuPre

Great Congregation Hears  
His Plea for Mercy  
for Bandit.

Delivering his first Sunday evening  
sermon in more than a month to his  
congregation at Central Baptist  
church, Dr. Cole A. Ridley, who has  
just returned from a month's visit to  
Texas, last night formally announced  
that with his return to Atlanta he  
would join forces in every way with  
those who are striving to save the  
life of Frank DuPre, the Peachtree  
street bandit, and that he would wage  
a vigorous fight for a commutation  
of the death penalty.

"The richest heritage," said the  
preacher, "that God ever gave a man,  
is a mother who loves her maker,  
and that is what Frank DuPre was  
deprived of in the days when he most  
needed her. I do not mean to leave  
those who are striving to save the  
life of Frank DuPre, the Peachtree  
street bandit, and that he would wage  
a vigorous fight for a commutation  
of the death penalty.

## LAWRENCE LEADS STRIKE INTEREST

to number about 10,000 in seven mills. Leaders of the one big union, after being refused co-operation by the heads of the United Textile Workers of America are attempting to swell their ranks and laying plans for independent strike, conducted by James McMahon, president of the United Textile Workers, has made Lawrence his headquarters for New England.

Boston, April 2.—For the moment observers of the New England textile strike are focusing their attention on the big mill center of Lawrence. The strike, which began in Rhode Island last week, spread to New Hampshire and followed up in Massachusetts in the middle of February, is only a week old in the most easterly of the mill cities on the Merrimack river. Because the strikers there are largely unorganized, there is more of a strike atmosphere than in Manchester and Nashua, N. H., farther up the river, and in the Pawtucket and Black Stone valleys of Rhode Island, where under the direction of union leaders the striking operation has settled down almost into a routine.

Two unions are trying to organize the Lawrence strikers estimated

to number about 10,000 in seven mills. Leaders of the one big union, after being refused co-operation by the heads of the United Textile Workers of America are attempting to swell their ranks and laying plans for independent strike, conducted by James McMahon, president of the United Textile Workers, has made Lawrence his headquarters for New England.

**Five Mills Open.**

Of the Lawrence mills in which the strike was called last Monday, because of a 20 per cent wage reduction, two were closed early last week. The other five, including the largest, the American, mills kept a part of their machinery in operation throughout the week, and announced they would be open tomorrow. In addition to strikers, 7,000 operatives are idle in Lawrence, and the movement is on the Arition mills, which did not announce any wage reduction, but attributed its indefinite shutdown to unfavorable market conditions.

Using slightly moistened air, a device to be operated over a stove is claimed to dry vegetables and fruits in such a way that their original flavor is retained.

## 120 Churches in Atlanta Holding Revival Meeting

With services in practically every protestant church in Atlanta, the city-wide revival began Sunday morning. A total of 120 churches are taking part in the religious movement, affecting a large per cent of the population of the city who are church members. The meetings should be ready for publication Monday.

All Baptist churches in Atlanta started their services Sunday, according to Louie D. Newton, editor of The Christian Index. While a few Presbyterian churches began special meetings a week ago, the majority entered into the city wide movement held by the Atlanta Service Sunday. Methodist churches in the city as a whole started the series of meetings on Sunday.

The Boy Scouts of Atlanta are rendering invaluable aid to the religious institutions of the city by counting

the numbers present at the meetings in each church. It was expected that an accurate accounting would be complete late Sunday. Dr. Marion McHill, of the North Avenue Presbyterian church, stated that the attendance would be ready for publication Monday.

There will be a meeting in the Tabernacle at 11:30 o'clock Monday morning for all church members in the city. Dr. T. H. Lewis, head of the Methodist centenary forces for the North Georgia conference, will preside.

Every morning during the week the Baptists of the city will gather at the First Baptist church at 10:30 o'clock. A similar meeting will be held at the same time at Wesley Methodist church which will be attended by Methodists of the city.

## Atlantans to Unite Today In City-Wide "Cleanup"

With the hearty co-operation of business concerns and individuals all over the city, the great Atlanta cleanup, with clean-up and paint-up work begins with a rush. Civic clubs, the Christian council, the chamber of commerce, the municipal authorities and other powers for civic improvement are back of the campaign.

Committees have been appointed for carrying on the details of the work and are headed by able chairmen who are thoroughly familiar with the field under their direction.

Local paint dealers reported substantial increase in sales of their products this week, and it is believed that many homes will soon have new coats of paint.

The Anti-Tuberculosis association is one of the most active organizations participating in the campaign. The organization has fully indorsed the campaign idea, and is lending the campaign much support.

Woodford is Chairman.

Major Key is honorary chairman of the campaign and Cator Woodford is chairman. Other officers are George West, secretary, and W. T. Perkinson, treasurer.

Committees announced Thursday at

headquarters of the campaign in the city hall are as follows:

Publicity: Evan P. Howell, chairman; finance: S. P. Thompson, chairman; suggestions: Mrs. W. L. Peel, chairman; stunts: Ivan Boehm, chairman; program: Mrs. E. M. Striplin; retail stores: Ivan E. Allen; automobiles: C. V. Hohenstein; buildings: obstruction: Graham Williams; street bazaar: John Gilmore; grocery stores and markets: P. H. Bullock; questionnaire: A. A. Jameson.

## KEY WILL SPEAK AT FORD MEETING

**Statewide Mass Meeting  
in Macon Set April 22  
to Pull for Ford Muscle  
Shoals Bid.**

Macon, Ga., April 2.—(Special). Following an informal conference with Mayor Luther Williams this afternoon, Walker T. Lee, secretary to Mayor James L. Key, of Atlanta, who also is secretary of the Georgia Association for Ford for Muscle Shoals, announced that April 22 is the tentative date for the big state-wide demonstration in Macon. The date chosen falls on Saturday, immediately following the convention of the Georgia Federation of Labor.

"We have not given up hope that Mr. Ford will be here in person," said Mr. Lee tonight before returning to Atlanta. "I am in a position to say that either Mr. Ford will be here in person, or he will be represented."

### Ford Not to Speak.

It is known that Mr. Ford is modest and doesn't like to appear in public, especially as a speaker. If he comes here it is entirely probable that he will come as a listener and that he will not be called upon for an address.

"Georgians want to show him that they have confidence in his ability to develop Muscle Shoals to their advantage," said Mr. Lee, "and we hope to bring him here."

The meeting will be a state-wide event. Mr. Lee stated, and besides speakers of prominence from various organizations—including the city of Macon, there will be invitations extended to former Governor O'Neal, of Alabama, and others.

"We want to crystallize popular favor for the Ford bid for Muscle Shoals," said Mr. Lee. "There also will be other meetings to be held in Georgia, one having been arranged for Savannah on April 6, at which Mayor James L. Key, of Atlanta, will be one of the speakers."

"Mayor Murray Stewart, of Savannah; Mr. Key, of Atlanta; Senator R. M. T. Rives, of Macon; Commissioner James A. Perry will come to the Macon meeting, we are certain. Invitations also have been extended to Governor Thomas W. Hardwick, former Governor O'Neal, of Alabama; W. J. Vereen, of Moultrie; G. E. Gandy, of Americus; Harry S. Stinson and J. Ellsworth Hall, of Macon, to make short addresses."

Judge Malcolm D. Jones, of Bibb superior court, has been asked to preside over the Macon demonstration.

While a tentative program has been arranged, it outlined the final arrangements for the meeting will be left in the hands of a joint committee to be headed by Mayor Luther Williams, with members of city council, and the chamber of commerce making up the rest of that body. It is anticipated that this will be the biggest mass meeting ever held in the city of Macon. A place for the meeting has not been selected. It has been suggested that it be held in the open air, but public speakers usually object to speaking in the open air.

### RAIL UNIONS MAY AID STRIKING MINERS

Continued from First Page.

ent negotiations are considering the very propositions of which even the suggestion nearly caused a strike. Every railroad employee in the country is involved in the wage hearings now on, or pending, before the board. In addition, the board has been before it the working rule hearings between the big four and the railroads. After regional negotiations had failed dimly, and, as an index of the trend of this situation, they are to be heard as soon as the shop craft wage hearings are concluded. The board promised the "big four" last November to submit to the railroads all working rules were established. The fact that these rules hearings are being pushed ahead so rapidly is believed by some railroad authorities

here to presage an early wage decision.

### TEST OF STRENGTH COMES TODAY.

BY THE ASSOCIATED PRESS.

The second day of the country-wide coal mine strike passed quietly with both sides preparing for the first test of strength which was expected today. Union officials maintained that 600,000 men, of whom 100,000 were non-union miners, were idle Saturday and that 6,200 mines were closed, while some 1,500 open shop pits were being opened.

While not disputing these figures operators declared many of those men would return to work today, as Saturday was observed as a holiday, the anniversary of the granting of the eight-hour day in the mines. West Coast operators also were reported preparing to reopen mines on an open shop basis.

In the main, however, both sides were expected to observe a truce and make no effort for the time being to operate the mines. The miners are supplying the engineers and pumps necessary to protect the pits from flooding.

In the meantime the eyes of the country will be turned to Washington, where John L. Lewis, international president of the miners, will appear before congressional committees to testify regarding strike issues. Government officials have held that only the existence of an emergency could justify government intervention and that such an emergency does not exist at this time because of adequate supplies of coal on hand throughout the country.

Reports from most of the unionized fields indicate that Sunday passed as quietly as usual. In many sections an exodus from mining to other occupations was indicated by miners, and thousands were expected to drift away from the coal fields affected by the strike during the week.

### STRIKE EFFECTIVE, SAVES LEWIS.

Washington, April 2.—The national coal strike is 100 per cent effective in the unionized bituminous and anthracite coal mines of the country and is getting support in non-union territory. John L. Lewis, president of the United Mine Workers, declared today on his arrival here to attend congressional hearings tomorrow.

There are 600,000 miners ready to strike on the union side indefinitely, until the operators are ready to discuss with us the question of new wage agreements in the central competitive field," Mr. Lewis declared, adding that while the union "counted investigation and the bituminous and anthracite industries." It seeks prompt intervention, but does ask for the support of public opinion in forcing the operators to continue collective bargaining with miners over wages and working conditions.

Discussions on coal reserves and the effect of the strike on the interest of consumers. Mr. Lewis strongly advanced the opinion that "a pinch would come earlier than expected." He declared, "Non-union mine production last year, 'was extremely slow,' and said that operators had been more than openly following tactics that forced a strike so they could get higher prices and greater profits."

### Non-Union Reports Slow.

"There won't be a single return to work this week," Mr. Lewis said, "from the 600,000 men who went out. It takes a little longer for us to get reports from the non-union fields. In the West Virginia panhandle, for instance, right along the Ohio line, there are about 5,000 or 6,000 men in non-union mines for whom meetings were held. There are probably 60,000 now. There are meetings here and there in non-union territory all over the United States. We'll get the returns later. In the union territory we know what happened; the operators aren't even going to try and run mines."

Taking notice of the suggestion by Chairman Borch of the senate labor committee, that the government ought to intervene further in the situation, Mr. Lewis remarked that he was "afraid nothing much could be done with the operators."

The welfare conference has been made to meet again to continue collective bargaining with us," he continued, "and I assume they will maintain their refusal no matter who tries to get them to conform. We stand ready, now as ever, to enter any conference with them to discuss terms of a new wage contract which will allow us to do."

### Only Break in Lines.

"If the miners today were occupying the position of refusing to discuss a wage contract, as the operators are,

they'd be morally castigated by all the citizenship of this land."

"The only break in the union lines," the miner's president said, was in western Kentucky, where operations were being conducted under a contract which runs until April, 1923."

"They will stay on the job of course," Mr. Lewis said. "The coal they get out does not enter into central and eastern field competition because it goes south to market."

Although the operators regard each other as competitors, Mr. Lewis said, "we are not acting in concert, we know that we can't get a general wage scale without unity of action in the central competitive field, because a difference of a cent a day in wages means cents per ton in the selling price of coal, makes tumult in markets and closes up old mines to open new ones."

### Strike Inevitable.

"Still they were a unit in wanting suspension," he continued. "They had loaded up all the big consumers with coal on the strike scale and held up the market prices while the loading was going on. Now the think they're still down there and they'll be held up again, and a runaway market. Their disposition made the strike inevitable."

Mr. Lewis estimated the maximum production of the non-union mines at 4,000,000 tons a week, much of which, he said, was good only for coke. Further, he declared, the middle west could not pay the freight to get this coal.

"Watch the public utility companies in the smaller cities," said the strike leader, "they will be first. The big cities are pretty well stocked, but the little ones are not."

Mr. Lewis expected to remain in Washington as long as presence is required, but said he had no engagements with President Harding or executive officers.

### CONGRESS IMPELLED TO RUSH PROGRAM

Continued from First Page.

when finally enacted, will be one which every section of this country will gladly support. As there never has been such a need for a tariff which recognized all sections alike, and as there has been such a unanimous demand for tariff legislation, I think we may say that Congress will never adjourn until the tariff bill is passed."

On Valuation Plan.

Gooding characterized as "anti-American propaganda" the criticisms directed against the American valuation plan of assessing duties. Congress, he declared, would adopt "some form of American valuation making it a sort of all-American in every respect."

"Senators from agricultural states, in asking for a tariff on products of the farm have been extremely liberal," Gooding said. "They have never asked for a tariff which would not fail. They believe the time has passed when the east is the only section which should be safeguarded from a foreign economic invasion by a tariff, and they have been gratified to find that this view is shared by manufacturers and producers."

The executive committee of the tariff bloc is composed, in addition to Gooding, of Senators McNary, of Oregon; Johnson, of California; Capper, of Kansas, and Nicholson, of Colorado. Other members are: Lippman, of New York; South Dakota, of South Dakota; Jones, of New Mexico; Poindexter, of Washington; Staabfield, of Oregon; Shortridge, of California; Oddie, of Nevada; Ladd, of North Dakota; Bursum, of New Mexico; Cameron, of Arizona; Warren, of Wyoming; Spencer, of Oklahoma; Willis, of Ohio; Harless, of Missouri; Newell, of Iowa; Weller, of Maryland; Keyes, of New Hampshire; Townsend, of Michigan; Sterling, of South Dakota, and Rawson, of Iowa.

### Opinions Differ.

Wide differences of opinion exist as to the wisdom of imposing high duties on every rural church in Georgia, famous Georgia novelist, as one way of making rural life more attractive. She declared in an address that something was done to make rural conditions more attractive to the country boy and girl than soon they will all leave the "wheat belt" you town people eat something to eat?"

"We must give the country boy something better to look forward to than following a mule up and down endless furrows," she said, "and the country girl something more than hours of toil in making a home."

The welfare conference opened this morning to continue through Monday. Prominent educators from all northwest Georgia are in attendance. Burr Blackmer, secretary of the state board of public safety, presided. He also spoke on child protection, children in delinquency and delinquent children.

T. F. Abercrombie, secretary of the state board of public health, preside at the session of the conference Monday.

He is to lead a discussion on child hygiene and public health at the m-rning session.

## FARM AND BUSINESS OUTLOOK IS BETTER

Washington, April 2.—Acting Director Davis, of the War Finance corporation, in a statement today noted "marked improvement in the condition of the agricultural industry and in the financial condition of our country" on the basis of April 1 reports.

"Live stock producers and farmers generally," the statement said, "are more optimistic concerning the future than at any time in recent years."

"Bank deposits have increased in many agricultural communities and the country banks are generally in a stronger position than they have been for a long time. Best of all confidence in returning and winning back the business is toward a restoration of more normal conditions all along the line."

Up to March 31, the statement said, the corporation had approved loans aggregating \$322,825,000, of which \$287,516 to co-operatives and \$35,300 to export purposes.

### CONTINUATION

Continued from First Page.

what shall it profit a man if he gain the whole world and lose his own soul?"

An immense congregation greeted Dr. Ridley, who had been in Texas for about a month, recuperating from a serious nervous breakdown occasioned by overwork while carrying the double duty of his church labors and his official work for the Knights of the Ku Klux Klan. The rest taken by Dr. Ridley proved highly beneficial, however.

"The Ten-Thousand-Clean-Up Campaign," which had been inaugurated by Dr. Ridley before going to Texas for the purpose of raising the indebtedness of the church, which has since been paid off in a satisfactory manner since his departure under the management of W. H. McElroy, will be taken up with renewed vigor by Dr. Ridley, and it is expected that the campaign will be brought to a speedy successful conclusion within a short time.

### PASTOR RESIGNATION REFUSED BY CHURCH

Continued from First Page.

Macon, Ga., April 2.—(Special) Charles V. Sanford, member of prominent family of Georgia agriculturists, died today at his home on College street, at the age of 77 years.

Mr. Sanford was the son of the late Shelton P. Sanford, L. L. D., author of the famous Sanford Analysis of Arithmetics, taught for years

a professor at Mercer university.

During the war between the states Mr. Sanford served in Cutts' battalion, Irwin artillery, in the confederate army. He moved to Macon 32 years

ago.

Four sons and one daughter, Stephen V. Sanford, professor of English and in charge of athletics at the University of Georgia; C. D. Sanford, Shelton P. Sanford and Paul H. Sanford, and Mrs. Kelly P. Allen, of Macon.

The funeral will be held tomorrow afternoon at 4 o'clock and interment will be in Riverside cemetery.

### QUAKE IS RECORDED ON U. S. SEISMOGRAPH

Continued from First Page.

Washington, April 2.—An earth movement of "moderately intense" was recorded this afternoon on the seismograph instruments at George town university. It lasted from 2:47 p.m. to 3:22 p.m., and was estimated to have been centered about 2,000 miles from Washington.

FREE TREATMENT

For one week only (ending Monday, April 10th,) all who apply will be treated FREE (Laboratory charges for material used excepted). We are making this special free offer at a time when we know it will benefit many sick people.

No Other Treatment to Compare

With It.

We are frequently asked what Auto-Serum Therapy will do in cases of Diabetes, Epilepsy, Goitre, Hay Fever and Asthma. We are thoroughly convinced, from personal observation and from the reports of numerous other physicians, that the number of cases of

Auto-Serum Therapy is incontestably cured. We are further convinced that there is no other treatment for these diseases that can compare with Auto-Serum Therapy for such troubles.

THE COAL STRIKE.

The nation-wide coal strike is on, approxi-  
mately 600,000 miners, according to union officials, having  
walked out on April 1, and coal produc-  
tion is seriously impaired.

Strike leaders declare that the  
strike will continue until their de-  
mands are met by the mine oper-  
ators; the latter, that it will con-  
tinue until the striking miners see  
fit to return to work under more  
reasonable conditions, or until  
their places can be filled.

The government has announced  
a "hands-off" attitude toward the  
controversy, but gives assurance  
that it will see to it that the in-  
terest of the public is adequately  
safeguarded.

From the standpoint of the pub-  
lic that is all that can be expected.

If the miners want to quit work  
and join the already congested  
ranks of the unemployed, that is  
their right. This is a free country,  
and nobody has a right to make  
them work, so long as they refrain  
from violating any law.

And if the mine owners elect to  
keep their mines closed until they  
can procure labor willing to work,  
that is their business, and nobody  
has a right to interfere with it so  
long as it entails no suffering on  
the part of outsiders.

But the government must bear  
in mind the fact there is a third  
group concerned in this contro-  
versy, and its interest transcends  
in importance that of either of the  
other two or of both together.

This group comprises the great  
masses of the American people.

The interest of that group must,  
at all hazards, be protected; and  
the public looks only to the gov-  
ernment for such protection.

The government has done all,  
perhaps, that it should have done  
up to this time, in trying its level  
best to avert the strike.

It endeavored faithfully to get  
the miners and the mine operators  
together to dissolve their differ-  
ences in calm, friendly discussion.  
It failed.

Now all that the government can  
do, or should do, is to see to it  
that the two elements involved as  
principals in the strike commit no  
violation of the law, and that the  
public does not suffer from the  
lack of coal, provided there are  
enough men ready to work to pro-  
vide the required supply.

**JOBLESS AND UNDERFED.**

United States army recruiting of-  
ficers in New York say their work  
is being seriously handicapped by  
unemployment.

This announcement may seem  
to present a somewhat paradoxical  
condition, but in light of the ex-  
planation accompanying it, it sug-  
gests a situation that is both pa-  
thetic and alarming.

Under ordinary conditions, all  
things being equal, when civilian  
jobs are scarce, the recruiting of  
men for military service is corre-  
spondingly easy, for reasons that  
are obvious. But now, it seems,  
the normal situation is reversed,  
not because of unwillingness upon  
the part of jobless young men to  
enter military life, but for the  
tragic reason that the vitality of  
so many of them has been sapped  
by undernourishment to a degree  
that renders them incapable of  
measuring up to the physical re-  
quirements of the army.

The New York Herald a few days  
ago carried in its local news col-  
umns a statement to the effect that  
"unemployment among the younger  
men of the city has undermined  
their physical efficiency to the  
point that four out of every five

who apply for enlistment in the  
United States army are rejected,"  
and cites as its authority Colonel  
W. B. Atkinson, in charge of a New  
York recruiting office.

This officer told The Herald that  
"while the physical standards for  
enlistment are high, it has been  
found that many young men who  
offer themselves are underfed and  
under-weight in consequence of  
prolonged unemployment;" and that  
of twenty-three men who had  
applied for enlistment that day  
only five were accepted!

Much has been said and written  
bearing upon the relationship be-  
tween unemployment and the so-  
called "crime wave," and there has  
been much citation to records to  
support the contention that the  
tendency of protracted involuntary  
idleness is to turn the minds of  
men in the direction of criminal  
conduct.

Undoubtedly there is ample basis  
for such argument, and that fact  
of itself is deplorable enough.

But when any condition contin-  
ues until it results in depletion of  
the physical man-power of the  
country to the extent indicated by  
this recruiting office record it be-  
comes truly alarming.

The cause behind the condition  
is not the main question in this  
connection, but the situation, which  
speaks for itself, must be remedied,  
and the "best minds" of the coun-  
try can well afford to apply them-  
selves to that end.

## ARMENIA IN PERIL.

Recent dispatches indicate a  
growing inclination on the part of  
the allied powers to yield to the  
claim of Turkey to governmental  
jurisdiction over Armenian terri-  
tory. In order, it is alleged by  
friends of the Armenians, to pla-  
cate Islam and prevent further  
Mohammedan uprisings in India  
and Africa.

The proposal that the Greek  
troops be withdrawn from the ad-  
vance positions they are holding,  
and that territory now occupied by  
Greece be surrendered to the  
Turks, not only adds color to these  
reports, but is calculated to make  
the civilized world shudder at the  
thought of the fate that probably  
awaits the Armenian Christians  
if events should take that course.

The tendency of this is all in  
the direction of a restoration of  
Turkey to its former position as  
a world power—a position which  
the Moslem despotism has used to  
destroy, rather than to promote,  
civilization, and in such a way as  
to make "the unspeakable Turk"  
a traditional universal household  
phrase suggestive of all that is  
brutal and barbarous in human na-  
ture.

## PROGRAM OF OLD SONGS GIVEN BY QUARTET

Sunny City Four Makes  
Radio Debut Over WGM,  
Through Constitution.

A program of old songs was presented by WGM Sunday night, when the Sunny City Four, a group of singers connected with the world's fair committee, made its radio debut.

With the exception of one song, all of the numbers given by the quartet were songs that have been offered by quartets for several years and probably recalled to many radio enthusiasts who heard them other days and times.

Members of the quartet are Bob Hughes, Lamar Stephens, Owen Bennett and Jim Waits.

The program was as follows:

- "Down Around the River."
- "When It's Orange Blossom Time in Loveland."
- "Down Yonder."
- "Tuck Me to Sleep in My Old Tucky Home."
- "I'm Just the Same, Sweet Adeline."

The program was arranged through M. D. Gleason, secretary of the world's fair committee.

### MAURETANIA

*World's Fastest Ship*

Re-enters Atlantic trade after conversion to oil-burning. Sails from New York, Tuesday, May 10, and regularly every three weeks thereafter in conjunction with AQUITA- NIA and BERENGARIA, providing the fastest express service between New York, Cherbourg and Southampton. Sailings every Tuesday.

If you would enjoy an additional day or two at sea with the maximum Cunard comfort, then try one of our new 20,000 tonners, SCYTHIA, SAMARIA, LACONIA or the new Anchor Liner CAMERONIA, 16,700 tons.

## UNCLEAN BODIES

Soon Become Unfit for Work

When you are constipated, your liver is sluggish and you suffer such ailments as headache, indigestion, sour stomach and so on.

Your mind is incapacitated, you are unfit for work, you feel tired, you betray it in your working and thinking.

Keep your body clean, your mind clear and energetic, the failure of the body to live. Get the new St. Joseph's Liver Regulator. This splendid compound of roots and herbs selected especially for the liver, relieves constipation, bloatedness, headache, sore stomach, indigestion. It can be taken either before or after meals—either day or night. It is a pinch of powder to be taken. You cannot overtake it, as it does not nauseate or gripe.

Your druggist can supply your large can 25c. This is the best investment. The Gerdele Medicine Co., Memphis, Tenn., for free sample and a 1922 St. Joseph's Almanac.

## RADIO DEPARTMENT

### FORMER OFFICER TELLS OF RADIO IN ARMY

Describes Study of Wireless  
and Equipment He Found  
in Planes.

The development of the radio telephone during the past five years is no more striking than it was, and now is a logical development. In what was then the early stages of radio telephony the first principle seems to have been secrecy. Everybody talked,

### FIFTEEN MINUTES OF RADIO EACH DAY

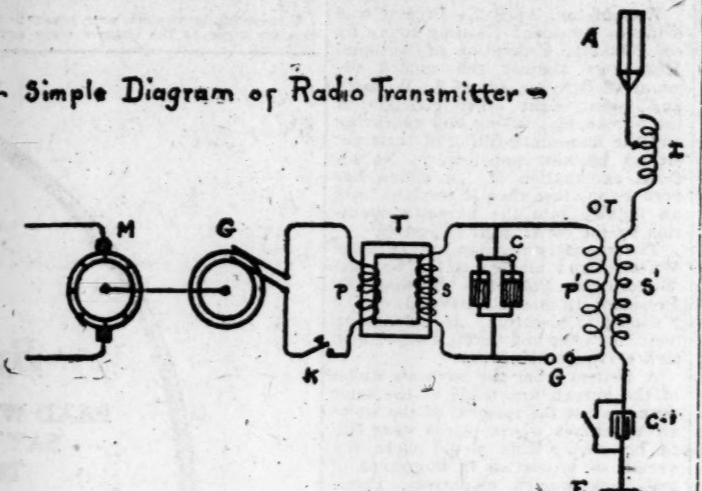

BY EDWARD N. DAVIS

Formerly Technical Electrical Expert for United States Government

Before proceeding to explain in detail the construction and operation of the various pieces of apparatus used in radio transmission, it is very essential that the student have clearly in his mind an outline of the fundamental circuits of a radio transmitter. By knowledge of these circuits and a general understanding of the functions of their component parts, a definite foundation is acquired upon which to apply the more detailed explanations, which are to follow, concerning each item of apparatus necessary for the proper generation and transmission of electric current.

The simple diagram, shown with this lesson, contains the essential parts of a radio transmitter. The student should refer constantly to this diagram and its accompanying explanation in order to grasp thoroughly the principles of operation. A few items of apparatus such as instruments for the measurement of voltage, current, and power in different parts of the circuit, the starting box for the direct current motor, the regulator in the circuit of the alternating current generator, and so forth, have been intentionally omitted and will be included in lessons which are to follow.

Simple Diagram of Radio Transmitter

An explanation of the manner in which this circuit functions is as follows: The direct current motor (M) receives current from an outside source usually at a pressure of 110 volts, which produces rotation of the revolving elements, or armature, of the motor. The armature of the alternating current generator (G) being mounted on an extension of the motor shaft is caused to revolve by the mechanical energy imparted through the shaft, by the motor. Revolution of the generator armature develops an alternating current at a pressure usually between 110 and 500 volts, depending upon the mechanical construction and electrical connections of the generator.

By closing the transmitting key (K) the alternating current developed by the generator flows through the primary winding (P) of the power transformer (T). The rapidly changing magnetic field caused by the current in the primary winding cuts the secondary winding (S) and induces a current in the secondary winding at a greatly increased pressure ranging from 10,000 to 20,000 volts, depending upon the design of the transformer.

The battery of condensers (C) are connected across the terminals of the secondary winding (S) and these condensers store up a charge for each alternation of the current in the secondary winding. When the condenser has charged to its full capacity it discharges through very rapid oscillations across the spark gap (G) through the primary winding (P) of the oscillation transformer (OT). These oscillations are transferred from the primary winding (P') to the secondary winding (S') of the oscillation transformer (OT) and the energy of the oscillations is radiated from the antenna or aerial (A) in the form of electromagnetic waves.

The aerial tuning induction (I) and the short wave condenser (C1), one end of which is connected to earth at (E), are used to limit the time period of oscillation of the antenna circuit and their function will be described in detail in lessons which are to follow.

With this outline in mind the student will be able to build up a more detailed knowledge of the workings of the various pieces of apparatus and their relations to each other.

(Copyright, 1922, for The Constitution)

LIEUTENANT W. W. HOSP

if at all, in whispers; everybody was warned against telling any secrets to anybody else, nobody had any secret of fact, had any particular secret to tell. It was all a deep mystery, especially so in the army, where the instructors themselves did not know exactly what they were teaching, for many of the principles were secret to them too. One of the instructors at Kelly Field, Texas, during the entire period of the participation of the United States in the war was Lieutenant W. Hosp. Even before he was Lieutenant Hosp commercialized the airplane, and since the development of the airplane, he has adapted it to his private plane, and brought it to its highest state of perfection for the airship Jazbo.

"My ambition now," said Lieutenant Hosp, "is to fly some night while everyone is sleeping. I have a radio telephone receiving set and am listening and send them a message of my own."

"After my enlistment, and sent me to Kelly Field, and put a first lieutenant's silver bars on my shoulders, I found that flying was rather a side issue of what I was to be called upon to do."

Studied Theory.

"In every course except radio the fliers spent much time studying cycles of operations, functioning parts, nomenclature, etc. Radio, however, was handled differently. Radio officers were appointed who supervised the installation and operation of the radio, and a flier simply pushed a button. When he was first assigned to a ship that had a radio telephone he was given surprise orders that he would hardly have to push a button and would not have to spend hours of preliminary theoretical study, as in other subjects.

I looked into the cockpit of my machine, which had just come from a radio plane factory, and saw a box which had a black panel well covered with knobs and dials. There were about six openings cut in the panel, through which one could see six little bulbs burning. Numerous wires ran from the box to the rest of the plane. The radio equipment was quite popular in the service.

"It was hung on a light framework of half-inch pipe in front of the pilot seat, and was about twenty-four inches long, sixteen inches high, and about six inches deep. The power supply of 300 volts for the plates of the transmitting tubes was installed on a landing gear strut and operated from the air pressure against a small propeller attached to it. A storage battery system was also installed between the landing gear sets and this lit the filaments.

The receiving and sending set were practically in one. The mouthpiece rested on the chest of the pilot and the receiver was in a special helmet.

Described Operation.

"Simply pushing a button on the box lighted the six bulbs in the box, and after that one could talk. By pushing another button one could receive. The SCR-68 could talk to a distance of twenty miles to another plane in the air within a radius of twelve miles. Various antennae were used, and the motor was used as the

wireless power source.

Radio Editor—Can I use a loose coupler with a vacuum tube, and is it possible to use a loading coil with this?

—Yes, you may use both of these instruments with a vacuum tube, but the circuit is not a very good one. Why don't you make a regenerative set if you are going to use a tube for a detector? This outfit will receive the music fairly well.

Radio Editor—Can I use the enclosed hook-up for the ground connection? What is the tickler coil used for? Is a honeycomb coil set if the set is not good?

—Your hook-up is all right. The tickler coil is not used in a set that is not regenerative.

Radio Editor—Will the gas pipe serve as a ground connection?

—The gas pipe will serve as a ground if you are sure that it hasn't got an insulating bushing in the line somewhere. The cold water pipe is far by the best.

Radio Editor—I have an Aerola Senior set and would like to know if I can hear WYCB or merely enlarging my aerial? (C. A. P.)

—This will not help you to get up to the desired wave length. You will have to add some sort of a loading coil to the set.

Radio Editor—Can I add a two-step amplifier to a Westinghouse Senior set? Will there be interference from car lines if I have the serial on the roof of a four-story house? Will a single wire aerial 60 feet long be as good as two wires?

—You may add amplifiers to any set that uses a vacuum tube for a detector. As your aerial will be so high above the car lines you

### NOVEL EXPLANATION OF WIRELESS FREAK

Rectifier for Storage Batteries Blamed for Disruption of Service in New Jersey.

That the rectifier for charging storage batteries of automobiles was responsible for the disruption of the telephone service in Asbury Park last week is the novel theory advanced by Joseph Newman, an electrician of Belmar, N. J., three miles south of Asbury.

Newman declared that search for a grounded high tension wire or hidden wires led nowhere and that the automobile boriales—these were the three theories most generally advanced—would, if responsible, cause more than a local disturbance.

The trouble, he said, "will likely be found if the use of the mercury as rectifier for charging storage batteries is checked up. I have found that when these rectifiers are in use by automobile men here that they are set up practically useless."

Mr. Newman said he got his idea from the fact that the opening of his cash register would destroy until it was closed, the receivable of his own radio set, and that he then launched inquiry into the possibility that the rectifiers diverted the radio waves.

Automobile men who specialize in

The French inventor of an automobile driven by an aerial propeller has shaped the blades of the latter like the wings of a bird.

Study of Dictionary Is a Profitable Habit for Business Men.

Inability to choose the right word often places a speaker in an embarrassing position. Many business men lose money because they are not able to express what they want to say when they dictate their correspondence. Greater freedom and accuracy in speaking and writing can be acquired by studying a dictionary. A few minutes devoted to the study of words and their meaning each day will in a short time result in great benefit to anyone who will put that practice to a test.

The New Universities Dictionary being offered to readers of this paper is particularly adapted to aid those who wish to acquire greater familiarity with the English language. It contains many words which have come into common and proper use in recent years. Its definitions are simple and accurate, making it possible to choose words that will best serve the purpose of correct speaking and writing. Many of the new words that have been brought into use through such varied activities as aviation, golf, baseball and other forms of sport have been conveniently classified in supplementary dictionaries.

### COMMUNITY WIRELESS FROM NEW ANGLE

Bank President Inquires  
About Radio Set With  
Home Extensions.

Wita radio sweeping the country in such a way that every city, town, village and hamlet has its enthusiasts, almost innumerable towns of 1,000, 5,000 inhabitants are making arrangements for or contemplating installing wireless receiving sets in a hall where a magnifying or loud speaker of some other type can be used.

In a letter to the department, W. W. Harris, president of the First National bank of Sparta, Ga., makes a suggestion which may be of benefit to other places. He asks whether it would be practicable to have one large set at a central point and have telephone extensions into the homes of the different persons interested.

The practicability of the plan suggested by Mr. Harris' inquiry is evident in a hall and ground floor installation inasmuch as light sockets can be used only in short distances apart.

In the same letter Mr. Harris asks about the cost of home sets. They can be purchased in limited numbers from electrical supply houses at a cost of \$25 to \$300. The less expensive sets may be used only in short distances apart.

The presence of electrical equipment in a home is a matter that does not affect radio equipment installation inasmuch as light sockets can be used only for transmitting sets and receiving sets require licensed operators. Of course amateurs, by acquainting themselves with the intricacies of wireless telephony may obtain licenses.

will not be troubled with interference. The single wire aerial will give the same results as a double wire one. The second wire in the aerial will not help you to receive any better.

DRINK OR DRUG

POISONING requires ELIMINATION. The New Treatment acts as an ANTIDOTE for the effects of poisons, venoms, drugs and overdoes and overcomes the diseased condition. (No Hydrocine used.) Dr. J. H. Conwell, 10 years with the "Keedzy," in charge of New Industries, 229 Woodward Ave., Atlanta, Ga.—(adv.)

charging automobile batteries, he said, are rushed by people who have recently taken their cars from storage and by others just coming to the coast to open their summer homes.

"The route will likely continue most of the summer," he declared, "and increase for a time up and down the coast, with probably resorts on Sundays from the annoyance to radio enthusiasts.

Mr. Newman found plenty of time to argue with him on the above proposition, however.

### JACKSON PLANS RADIO STATION; BOARD APPOINTED

Jackson, Ga., April 2.—(Special.) Encouraged by the success of other cities, particularly that of Atlanta, business men of Jackson are considering the installation of a radio station here. The matter has been taken up by the Kiwanis club of Jackson and already have private plants in operation.

a committee has been appointed to ascertain the cost of establishing such a service. It is generally thought a radio station would be of considerable help and convenience to the citizens in obtaining the latest market and weather reports, as well as the entertainment feature. Much interest has been manifested in amateur radio, which is practically sure to have a plant within the near future. Several of the amateur electricians already have private plants in operation in Jackson.

## First Woman City Treasurer Assumes Office in Columbus

Columbus, Ga., April 2.—(Special.) Columbus has a woman city treasurer. For that matter, Miss Margaret M. Affleck, who entered upon the discharge of her duties as treasurer of the city of Columbus yesterday, is probably the first woman to hold that official position in any city in the world—certainly of any city of importance.

The singular feature of the naming of Miss Affleck is that she is not a suffragist, never was, and probably never will be.

Peculiarly enough, though, she was the first woman to register in Muscogee county. Having been given the privilege of casting her ballot, Miss Affleck immediately qualified and has voted in every election since she became qualified.

Another feature of the appointment of Miss Affleck is that, although her appointment was conducted by a city commission that came into being because of the overwhelming vote of the women, she was not named because of her sex, but because of her efficiency that everyone recognizes.

Miss Affleck was employed about three and a half years ago as assistant to Treasurer J. Don Cargill, whom she succeeds.

Except for short vacations during the summer months, Miss Affleck has not been absent from her office more than ten days during the entire time—the absence being caused by illness.

"The Affleck smile" has some a long way toward making her the popular treasurer that she is. She has never become ruffled over the less in wading through thousands of papers in her office, according to her co-workers, and her good-natured manner has won for her a wide circle of friends.

This woman treasurer has no small job ahead of her. As an example of the responsibility that has been placed on her shoulders, it might be mentioned that during the year 1921, as

MISS MARGARET AFFLECK.

friends, however, are authorities for the statement that she is somewhere between 25 and 40.

The first question Miss Affleck was asked upon her election by the reporters, hiding behind a couple of chairs for protection, was:

"How old are you?"

"I am old enough to know what I am doing," was her reply, with a smile on her face, as she turned again to her duties.

There is no one in Columbus who is more elated over the appointment of a new city treasurer than her predecessor, J. Don Cargill, whose resignation was accepted the day Miss Affleck was named.

W. M. S. Meeting.

Mrs. J. M. Lathem, president of W. M. S. of Wesley Memorial church, announces the regular monthly business meeting at the church at 3 o'clock Monday. Mrs. W. C. Brodon, secretary, joins Mrs. Lathem in urging the members to attend in large numbers, as this is a very important meeting. The revival beginning April 2 will be an important topic.

Mrs. E. E. McDonald, of Chattanooga, Tenn., spent the week-end with her son and daughter-in-law, Mr. and Mrs. Herbert E. McDonald, of Highland avenue.

assistant city treasurer, Miss Affleck handled over a million and a half dollars, and every cent of the money was properly accounted for.

No doubt every reader of this article, before now, has wondered how old the new city treasurer of Columbus is. However anxious the writer might be to satisfy the curiosity of these readers, it might be stated right here that they will conclude the perusal of this little sketch of the "First Woman Treasurer" without knowing the age of the boss of the Columbus treasury. Her closest

friends, however, are authorities for the statement that she is somewhere between 25 and 40.

The first question Miss Affleck was asked upon her election by the reporters, hiding behind a couple of chairs for protection, was:

"How old are you?"

"I am old enough to know what I am doing," was her reply, with a smile on her face, as she turned again to her duties.

There is no one in Columbus who is more elated over the appointment of a new city treasurer than her predecessor, J. Don Cargill, whose resignation was accepted the day Miss Affleck was named.

A very interesting illustration was given by H. L. Alsobrook, of the A. B. and A. railway, on the subject of the farm program, reading a dozen different magazines of the country of California and California products and for the state of Florida, which he said was the best advertised northern state.

After the program a barbecue was served to the guests by the Turner county board of trade.

**Much-Traded Child Awarded to Mother On Habeas Corpus**

Tifton, Ga., April 2.—(Special.) Mrs. Katie Brandon, of Akron, Ohio, was awarded the custody of her 9-year-old son, Harold, in habeas corpus proceedings brought before Judge Price of the city court of Tifton, against her divorced husband, Paul Brandon, who lives near Ellenton, in Colquitt county.

It is said that Brandon took the child from his mother and brought him to Georgia. The mother came to Georgia about a year ago, took the child in turn and carried him back to Akron, after which she had him sent to Ohio, and the child changed names for the third time. In December Mrs. Brandon secured a divorce and in the decree was awarded custody of the child. She went to Ellenton last week, secured the boy and brought him to Tifton, where the father is now working. Mrs. Brandon then employed an attorney, brought habeas corpus proceedings, and the child was turned over to her.

It is stated that the couple lived near Cartersville, Ga., before their marriage, at which time the bride is said to have been 14 and the groom about 30 years old.

Roland C. Ellis outlined the methods found best under boil weevil conditions in the states west of Georgia. He said that large sums had been leave-

Contracts have been awarded for electrifying 170 more miles of the South African railway.

## Armstrong's Linoleum for Every Floor in the House

**Soiled, muddy feet, or spilled grease or liquids will not harm Armstrong's Linoleum Rugs**

Why don't you use a Linoleum Rug for that hallway, kitchen, nursery, or bedroom?

LINOUEUM rugs can be washed. A damp rag and a little soap will remove all traces of grease. They never have to be taken out and beaten or shaken. Dirt does not get into them. They are easy to keep clean, fresh, and new-looking.

Armstrong's Linoleum Rugs protect floors, taking the place of fabric rugs. Many people use linoleum rugs in dining-rooms. They lie flat and smooth and stay where you put them. They are very durable and last for years.

Good furniture and department stores can show you the beautiful patterns—not ugly, crude, but in perfect taste—from which you can select one that will look well in your home. Ask to see the Armstrong's Inlaid Rugs—the colors go through to the burlap back.

Send for our booklet of colorplates, "Armstrong's Linoleum Rugs." Every Armstrong Linoleum Rug is guaranteed to give satisfaction.

## TRESTLE COLLAPSE TIES UP RAILROAD

ing the state employees to buy products which could be raised as cheaply and often more cheaply, than in other sections. He said that there was a particular need of more poultry, eggs, dairy and beef products to supply the need of the section.

H. G. Hastings gave a short review of the section had been developed by settlers moving in from north Georgia and other places and he predicted even greater progress in the future.

He said that, after visiting every state in the union, with the exception of a few or three, he had become convinced that there were great opportunities for the young man in any other state.

A very interesting illustration was given by H. L. Alsobrook, of the A. B. and A. railway, on the subject of the farm program, reading a dozen different magazines of the country of California and California products and for the state of Florida, which he said was the best advertised northern state.

After the program a barbecue was served to the guests by the Turner county board of trade.

**Much-Traded Child Awarded to Mother On Habeas Corpus**

Washington, April 2.—Not a train was operated on the Macon and Western railroad today due to the collapse of a fifty-foot trestle near Yatesville, Ga., last night. A freight locomotive and five cars fell thirty feet through the trestle into Topper creek. No one was seriously injured, according to the railroad officials. Passenger locomotives were used at both sides of the wreck today to haul material for rebuilding the trestle.

It is true that I own a lot within the county of Cherokee and I have offered \$300 per month to the girls' high school in place of the one now in operation.

On the 1st of April, I will be giving a speech at the annual meeting of the Georgia Association of the development department of the Southern railway; H. G. Hastings, president of the Georgia association; H. L. Alsobrook, of the development department of the A. B. & A. railway, and Judge Hudgeson, of the Peachtree.

The theme of the meeting was a program which would put this section on a sound basis of agriculture under bold weevil conditions. George T. Betts, president of the Turner county board of trade, expressed himself as confident that this could be done in a short time if there were the right amount of operation.

Roland C. Ellis outlined the methods found best under boil weevil conditions in the states west of Georgia. He said that large sums had been leave-

some situation exists in other parts of the city, due to the fact that a large portion of the bond money is being spent lots of schools, instead of the community schools. The only bond money proposed to be spent in the third ward is \$100,000 for a negro school.

Offered Large Rent.

It is true that I own a lot within the county of Cherokee and I have offered \$300 per month to the girls' high school in place of the one now in operation.

FLIVVERS AND BABIES

Your article about flivvers amused us because, for the last two months, we have been the happy possessors of one. We are loving it, almost, and have had in this short time more fun than we ever had with anything, except the baby."

That is a sentence from a letter I recently received from one of my letter friends. I wonder if it is as packed with suggestions and visualization to you as it is to me. It seems to me as if I were put in touch with that woman's whole environment by that sentence. Seems as if I knew all about the neighborhood she lives in. Maybe, it's because her description brings up a neighborhood that I know myself, from which just such a letter as hers might have come.

Do you know the neighborhood? The neighborhood I mean is a typical street in the New England town where I was brought up. It wouldn't be Main street, but Oak or Elm or Maple, one of the shorter streets that turn off Main street and take their names from the fact that they once had a preponderance of the tree named. Most of the houses are single houses, a few small new ones and a few larger, shabbier older ones. Two out of the three two-family houses on the street are old-fashioned houses made over. And as it happens, most of the occupants of these houses are young married or young middle-aged folks with lots of babies and small children (I mean lots in the modern sense, three in one house, four in another, five in another).

Not "Class" But Happiness.

The last time I went up that street on my last visit home I saw four

## DRESS

BY ANNE RITTENHOUSE

The Tailored Suit Is Strongly Sponsored for the American Spring and French Ideas Govern the Cut, the Color and Usually the Choice of Fabric.

Many things are to be said concerning the coat and skirt. Americans consider it their own pet offering to the history of dress, but France, with her usual adaptability, has taken up the American idea and worked it out with sufficient success to persuade Americans to carry them out.

This season she develops an ornamental coat with a slightly draped skirt, she puts a plain coat above a narrow skirt; she ornaments the sleeves until they are more important than the rest of the frock, she twists and turns the fabric so that those who are in search of curious ideas may find them.

In one way to say whether the French will closely follow the French or whether they will go along in their own path and continue to wear the narrow skirt and box coat of last year.

One thing is true; those that have these suits are apt to continue to wear them. France has sponsored these suits for more than a year, and it is now to us. Its little short jacket slightly pinched at the waistline, fastened with link buttons, its narrow sharp revers and long small sleeves put into tight armholes, show off the small American figure to advantage, but they make the big women appear unusually large.

Ladies who wear tailored suits always have strong influence over American costume, shows jackets that are straight and short, rarely covering the hips, and sometimes shorter by two or three inches in front than back.

Kasha is the material that Lanvin uses with liberality in these tailored suits. France has shown no inclination to permit this material to dimin-

ish in popularity. It is chosen in almond green, which is one of the dominant and delightful colors of the season in Paris; also in the pale sand and camel's hair coloring. To quote one of the best informed of the New York dress writers: "It is well to call everything by the name sand that isn't thoroughly defined as a striking color."

He may be right. He certainly saves trouble to the reporter and the girl behind the counter. There are many shades of sand and no one goes far enough in giving the word to word to that long list of fashionable tones that starts with gray, runs through beige, putty, cement, fog, mud.

Another thing that France has thrown out as bait for America is the tailored suit of red and blue. A sketch shows a boy wearing a curious jacket attached to a graceful skirt. Lanvin has given impetus to the widely pointed cuffs and the pointed band that finishes the jacket, both looking like artichokes. It is also due to Lanvin that the loose cravat in bright red is run under a red collar, its ends hanging to the waist.

Jenny, of Paris, sent several of these cravats to America in January, and the American tailors saw the opportunity to brighten a jacket or to give a finish to a low neck by using one of these carefree accessories.

THE HOUSEHOLD  
Edited by Anne Rittenhouse

### DIFFERENT KINDS OF OMELET

It is a trick of the good cook to make delicious omelets. And it is really not such a difficult trick. If the cook masters one good foundation omelet she can vary it according to her will, with just a change of details.

For one thing, there are all sorts of omelets made simply by adding some sort of spread before it is turned, or rolled. Jam or jelly omelet, for instance. These are made by spreading the omelet with jam or jelly before it is turned, but after it is thoroughly cooked. The jam or jelly melts, but does not become too soft by the time the omelet is served.

Then there is ham omelet, made by spreading the omelet with ham before folding it over. Or perhaps omelet, made in the same way. Either of these omelets may be made by mixing the chopped ham or the chopped parsley with the egg mixture before it is cooked. Either way is satisfactory.

For Spanish omelet simply make a regulation omelet and then pour around it a Spanish sauce, made by frying two tablespoons each of chopped sweet green pepper, chopped onion in four tablespoons of butter until the onions are brown, adding up to a cup of tomato pulp and juice. Season with salt and pepper. Some persons make a Spanish omelet—any omelet, for the matter of that—without mixing the white and yolk together thoroughly, but allowing some of the whites to remain in the pure yolks of the omelet in the finished omelet.

Remember that you may use a little water or milk—for tenderer results, milk for creamier—to the omelet mixture before cooking it.

### HOUSEHOLD SUGGESTIONS

#### When Cooking Sausages.

Sausage rolled in flour and sprinkled with cold water will not break in frying and will retain all of their flavor.

#### Solve the Cleaner's Bills.

If white kid gloves are rubbed gently with bread crumbs after each washing they will keep clean a long time.

#### Prevent Tarnishing.

Try keeping a piece of cotton combed in the drawer with your silver. You will find it will prevent the silver from tarnishing for quite some time.

#### Delicate Laces.

If more is used in delicate laces after the usual laundering, moisten them with a little water in which ordinary white sugar has been melted.

#### Care of the Bread Board.

So often the bread board does not get washed for weeks at a time. They should be soaked in warm water, and warm water, well rinsed, and dried in the sun every few weeks and they will never become discolored and soiled.

#### A Hint for Tough Meat.

The cook and more grisly meat is the more slowly it should be cooked. If you must economize in your cuts of meat, remember to cook more thoroughly. The result will be just as nourishing and good to eat as the more expensive cuts.

#### An Inland Lighthouse.

The lighthouse once off Atlantic City, well out to sea, is now 500 yards inland from the board walk and surrounded by paved streets and apartment houses. It is 100 years old, and stands half a mile off shore. The stones have added millions of dollars worth of land to the northern end of the island.

Tailored suit in red and blue with long cravat tied under rolling collar. The cuffs are cut in points at the edge to match the band on jacket.

## AN HEIR AT LARGE

### CHAPTER XXX.

It was Harry Rasher's first meal in the house of Mary Brook, although he had entered it once before when he delivered his first and only report for Mr. Stabb. Many times he had come with her to the gate, but invariably declined to come in. She thought it was because he was foolishly pensive about his working clothes.

"At last you have accepted my invitation!" was her greeting.

She noted that he was a white man, but she was the same one she knew so well. His brief moment of prosperity, she thought, had little effect on his simplicity of apparel, and somehow she liked him better.

"When I get rich the children dream.

Mrs. Brook greeted him kindly. She was n're and old fashioned in her manner, and, although he was utterly unconscious of it, she studied him with a keen appraise of a mother who has a mischievous gleam in the fashion circles of New York.

"When I get rich the children dream.

Mrs. Brook responded with a smile, and then they'd sit at the table.

"The people have been very kind," said Harry. "They are very thoughtful, Mr. Rasher."

"The people have been very kind," said Harry. "They are very thoughtful, Mr. Rasher."

"The people have been very kind," said Harry. "They are very thoughtful, Mr. Rasher."

"The people have been very kind," said Harry. "They are very thoughtful, Mr. Rasher."

"The people have been very kind," said Harry. "They are very thoughtful, Mr. Rasher."

## Food Supply Is Getting Short; U. S. Is Not Producing Enough

Statistics of the current food supply show that there is not enough food in the world to supply the normal consumption. According to Dr. E. D. Ball, United States department of agriculture, the immediate restoration of full buying power would result in the almost immediate disappearance of surpluses.

In the fifty years following the civil war, our cotton production increased fifteen times; when production four times, our crop increased three times and our population only two and three-quarter times. But says Dr. Ball, "The peak of agricultural production per capita of population was passed in 1880. Agricultural production almost kept pace with population increase for some little time after that date but in the last decade it has steadily and ever more rapidly fallen."

What does this mean? It means that measured in dollars, the United States today, is a food importing nation, that is, we import more sugars,

tea, coffee, spices, nuts and tropical fruits than we export of wheat and meat. It is estimated that by the end of this century, our population will be over 220,000,000 and that we will begin to import the staple foods in from fifteen to about thirty years from now.

If we are to escape this, we must either place more land under cultivation or produce more from the land already in crop. Dr. Ball states that "the larger areas of our rich, fertile and easily tilled land have already been taken up and that the increase in farm area in the future will be relatively slow. . . . National progress in the future must rest even more squarely back on the food-producing power than it has in the past."

If that is true, we must continually increase our acre production which essentially means the conservation of our principal national resources, the fertility of our own lands.—Philadelphia Public Ledger.

## Do You Keep Salesmen Waiting for You?

A student of business says one of the causes of the high cost of selling is the refusal of buyers to extend the courtesy of a prompt interview to him when he calls at their offices. Salesmen often spend half their time warming benches while the buyer is reported "in conference."

"Business is reciprocal," says the student. "I keep your salesmen waiting and you keep my salesmen waiting, and we both lose time." The man of a selling organization handling a specialty of high worth says business men all overlook the value of time, which cannot be wasted without loss or saved with profit. This waste of time is caused by buyers, a factor, he says. His salesmen, in their calls on prospective clients, kept waiting from five to thirty minutes, and even then sometimes do not see the men they seek. Occasionally the salesmen on subjects for-

sign to business, wandering all the way from politics to the caller's life history.

"That's not the worst," says the man of a selling organization. "Phone call from a man who wants our equipment. I make an appointment for a salesman to call at 2 p. m. the next day. The salesman is there on the dot. Occasionally he is informed that the gentleman who telephoned is out of town.

Time is only so much time on earth. But few persons in the manufacturing, buying, selling or distribution branches of business seem to appreciate its value or how it increases costs by its waste.

I am hopeful about the present generation.

They are taught the rising generation the true relation of time to economy in business and in the cost of living.—Richard Spillane in Public Ledger.

# CREST OF FLOODS IS SAFELY PASSED

With Exception of Old Town, Ark., Mississippi Levees Have Securely Stood Rigorous Strain.

Memphis, Tenn., April 2.—The crest of the Mississippi river flood passed Memphis last night and has almost reached Helena, Ark., where the river is reported about on a stand today, according to reports of the weather bureau here. United States engineers in charge of levee and river protection work in the district, extending from the Missouri line to Vicksburg, say that with the exception of the caving at Old Town, Ark., where they report the levee to have given way in a "severe category" condition, no serious trouble occurred at any point south of Cairo.

Major L. Y. Kerr, United States engineer in charge of the levees in the White River (Arkansas) district, early today sent Major Gardner from Little Rock to inspect the levees and thorough inspection of the situation at Old Town. Major Kerr tonight said that conditions at that point were "very satisfactory" and that "unless there would be a reasonable fair bid offered or if no funds were made available for the government to carry out the work, nothing would be done." He added that the levee was at that point breaking.

The force of men who have been continuously at work there since Thursday have done everything possible to repair Kerr's work after receiving a report on conditions from Major Gardner. "The caving has been stopped and the ends of the threatened break have been tied. Sub-levees all around the threatened break have been built with heavy timbers and bags and the situation now seems to be under control," he declared.

River Stationary.

Although the crest of the flood was expected to reach Helena yesterday, according to weather bureau officials, reports from the town say that the rise has stopped and the river is stationary. The highest point recorded there, the weather bureau reports, was 52 feet at 8 o'clock this morning, a rise of two-tenths of a foot in 24 hours. There is no longer any hope of a fall, and a further fall of two-tenths is predicted for tonight, with the rate of fall gradually increasing for several days.

Fall at Cairo.

A rise in the river due to rains in the central valley, was reported at Cape Girardeau, but at Cairo there was a fall of half a foot, the weather bureau reports. The river is also falling at New Madrid, Mo., and at Steele's Ark., above Memphis. At Cape Girardeau, water fell in twenty-four hours was an half a foot, indicating, weather bureau officials say, that the flood water is flowing out more rapidly than had been expected. They add that the rises in the upper Ohio and other tributaries of the Mississippi will not affect the present situation, or prove flood conditions. Below Memphis 52 feet was registered at Arkansas City to day, a rise of six-tenths of a foot.

Harry N. Pharr, chief engineer of the St. Francis levee board, tonight said that the falls had passed without a single report of damage. The water had fallen from any point, the 170 miles of levee along the Arkansas line under his charge. He added that he intended to retain the guards at all points where there was the least possibility of danger until the river dropped below the danger point.

Flood waters in the White and St. Francis river bottoms fell slightly to day and from reports to levee engineers no more lowlands will be overflowed. Many refugees who flocked to Marion and other towns for safety will return to their homes with in a few days, reports state.

**\$75,000,000 FUND  
TO JUNK WARSHIPS**

Continued from First Page.

scrapping a battleship, though other ships, with Germany and England in the lead, have made rapid strides in this direction since the war.

This plan probably will be given the support of the board of naval technical experts that is preparing a report to be submitted very shortly to Secretary Denby, with the plan described above and one or two others as alternatives.

Might Sink 'Em.

This report will point out that the obvious solution of the whole difficulty, with the price of scrap metal at rock-bottom and wages high, would be to sink all of the ships that are afloat.

The principal objection raised is that it is the economic waste in the material loss and its failure to provide employment for idle workmen as other plans would do.

Another proposal that is to be brought before the commercial interests will be to permit certain well-established firms, shipbuilding and others, to take over some of the old ships and scrap them on shares, making a fifty-fifty division of whatever profits accrue.

The principal objection raised is that it is the economic waste in the material loss and its failure to provide employment for idle workmen as other plans would do.

## Cotton Up Despite Industrial Trouble

New Orleans, April 2.—In the early part of this last week the cotton market was depressed moderately by the spread of the cotton mill strike in New England, but after declines of about a dollar a bale on the more active months which carried May off to 16.25, a much steadier tone was taken on as the result of excessive rains in the belt.

The upward movement continued until nearly the end of the week when the coal strike began to have a mildly adverse effect. At the highest May traded up to 16.81, at which level prices were 33 to 37 points higher than last week's close. The net results of the week were advances of 18 to 30 points with May at 16.62.

In the spot department, milling cane, 13 points, closing at 16.63, which prices compared with 11.23 as the closing price at the end of this week last year.

Rain Good for Georgia

Rains, which began this week, were regarded as highly favorable in some sectors and highly unfavorable in others. They broke the drought in west Texas, where, in some localities, the precipitation was the heaviest in they caused washouts and much damage to young cotton, with the result that much replanting will have to be done. In the central belt they made a bad flood situation worse and in the eastern belt they interfered with planting and preparations to plant.

Georgia got very heavy rains at the beginning of the week. According to the government's weekly returns, planting has been going on in an extensive way in south Georgia where such cotton already is up. According to the same authority planting in Texas has extended well up into the central counties.

The coal strike did not have much effect against values, mainly because it had been discovered on the trading in the past.

### Serious Strike Situation.

Strikes in New England took on a more serious aspect because of the increased number of operatives out working and the far larger amount of production of finished goods. Along with the spread of the labor troubles were reports to brokers here of yarn mills being forced to curtail their output, both in New England and in the south because of a lessened demand for manufacture of goods who were tied up because of labor trouble.

The week saw increased activity in the spot department and 7,927 bales were reported as shipped to 2,414 in the week last year, sales to be mounted to 5,606 bales against 1,408 this week last year. The better demand was explained by some spot people as being due to the filling of March commitments there is a great deal of curiosity as to whether it will extend into the coming week.

### TRAIN IS HELD UP IN NEW YORK SUNDAY

Poughkeepsie, N. Y., April 2.—Robbers early today held up a New York Central freight train south of Chelsea station, 12 miles from here, ordered the train crew to detach the engine and broke the seals of six cars. The robbers were backed up at the point of guns.

While railroad authorities confirmed the theory of police officers that the thieves had evidently intended to hold up a train usually loaded with valuable silk, which had passed through Chelsea earlier, they were unable to give any estimate of the amount or value of the goods believed to have been stolen.

The engine was sent several miles up the road while the robbers went through the cars. Telephone wires
